

**ICDT 2012**

Berlin, Germany, March 26-29, 2012

Program Chair

Alin Deutsch (UC San Diego)

Program Committee

Serge Abiteboul (INRIA and ENS Cachan)
 Marcelo Arenas (PUC Chile)
 Michael Benedikt (U. of Oxford, UK)
 Bogdan Cautis (Telecom ParisTech, France)
 Edith Cohen (AT&T Research)
 Rada Chirkova (North Carolina State U., USA)
 Claire David (LIGM, France)
 Daniel Deutch (Ben Gurion U., Israel)
 Alin Deutsch (UC San Diego, USA) [PC Chair]
 Ronald Fagin (IBM Research – Almaden, USA)
 Floris Geerts (U. of Edinburgh, UK)
 Gosta Grahne (Concordia U., Canada)
 Richard Hull (IBM Research - TJ Watson, USA)
 Daniel Kifer (Penn State U., USA)
 Maurizio Lenzerini (Sapienza U. Rome, Italy)
 Wim Martens (TU Dortmund, Germany)
 Maarten Marx (U. of Amsterdam, Netherlands)
 Tova Milo (Tel Aviv U., Israel)
 Anca Muscholl (U. Bordeaux 1, France)
 Dan Suciu (U. of Washington, USA)
 Jan Van den Bussche (Hasselt U., Belgium)

Important Dates

Abstract submission: July 22, 2011, 11:59pm PDT
 Paper submission: July 29, 2011, 11:59pm PDT
 Author notification: Oct 28, 2011
 Conference: March 26-29, 2012

The series of ICDT conferences provides an international forum for the communication of research advances on the theoretical foundations of database systems. More information about ICDT can be found at <http://edbticdt2012.dima.tu-berlin.de/>. Originally biennial, the conference is now held annually and jointly with EDBT.

For the 15th edition, we again call for original research papers that provide new insights into the specification, design, or implementation of data management tools.

Topics of interest: ICDT 2012 welcomes papers on topics including, but not limited to, the following: Access methods and physical design; Active databases; Complexity and performance; Constraint databases; Data exchange and integration; Data mining; Data models and query languages; Data streams; Databases and information retrieval; Probabilistic databases; Databases and workflow; Databases and the Semantic Web; Databases in e-commerce and in e-services; Deductive databases; Distributed databases; Integrity and security; Logic and databases; Query optimization; Query processing; Real-time databases; Semi-structured, XML, and Web data; Spatial data; Temporal data; Transaction management; Views and data warehousing; Privacy/Security and databases.

Submissions: Paper submission will be electronic. The submission web site is <https://www.easychair.org/conferences/?conf=icdt2012>. The deadline for abstract submission is July 22, 2011, 11:59pm PDT and the deadline for paper submission is July 29, 2011, 11:59pm PDT. Authors will be notified of acceptance or rejection by October 28, 2011.

Papers must be submitted as PDF documents, according to the ACM proceedings double-column format. Templates to prepare your submission can be found on the ACM SIG Proceedings templates website. It is not permissible to change the template's font size, margins, intercolumn spacing, or line spacing. Templates are available in Word, WordPerfect, and LaTeX (versions 2.09 and 2e). For the LaTeX formats, you may use either the standard style or the SIG-alternate style.

Submissions (including bibliographic references) may not exceed 12 pages. In addition, the authors may include an unbounded-length appendix (e.g. for proof details), with the understanding that the appendix is read at the reviewers' discretion and that all efforts should be made to render the submission's 12 pages self-contained.

Best Paper/Student/Newcomer Awards: An award will be given to the best paper. Also, an award will be given to the best paper written by newcomers to the field of database theory. The latter award will preferentially be given to a paper written only by students; in that case the award will be called "Best Student Paper Award". The program committee reserves the following rights: not to give an award; to split an award among several papers; and to define the notion of a newcomer. Papers authored or co-authored by Program Committee members are not eligible for an award.
